Hey Mark,

Thanks for your reply. I'll hold off on sharing anything with the Army for now.

I told Randy you're workin on it and he seemed OK with that.

I appreciate all the work you're doin on this. Good luck with it! Happy Holidays!

Bob

Bob, ironically I was discussing this same topic internally this morning. Since we last spoke, I have obtained working maps of the private properties in ArcGIS and MapInfo. We are looking into the possibility of adding the 6 additional regulated public water supply systems that were sampled on the maps, as well as existing (and perhaps proposed) municipal water lines located on and around the Depot. I need to speak with Seneca County first and I'll be coordinating with other DOH staff on producing the maps. Assuming this is approved and we get all the GIS information on one working map, I think that would be an appropriate time to share with everyone and we can coordinate to update the map as necessary. Give me a call if you wish to discuss. But please let Randy know we are working on it. The State's Water Quality Council is meeting today at 3:00 PM, so we may know a lot more on this subject soon enough.

- Mark

Hey guys.

I've been speaking with the Army about PFAS and the long email I sent them and Randy would really like the info he requested regarding the private well sampling.

I happened to mention the attached map and he asked if I would send it to him. I figured I better ask you guys first. Can I share the attached map with him?

Do you guys want to send it directly to him? Do you have other plans for sharing the info?

Please let me know. Thanks.

Bob

Melissa drew this up quick. There should be a couple more dots (I only count 20), but this is the general area we targeted last year.
